Dynamic Template

template.txt

Dynamic template

- By index
- Template

<http://www.elastic.co/guide/en/elasticsearch/reference/current/indices-templates.html>

Template by index

Add multiple field of every string fields

PUT kaidee

```
"mappings": {
```

```
  "product": {
```

```
    "dynamic_templates": [{
```

```
      "string_fields": {
```

```
        "mapping": {
```

```
          "index": "analyzed",
```

```
          "type": "string",
```

```
          "fields": {
```

```
            "raw": {
```

```
              "index": "not_analyzed",
```

```
              "type": "string"}}
```

```
    "match_mapping_type": "string",
```

```
    "match": "*"
```

Demo

Create index template

```
PUT _template/template_kaidee
{
  "template": "kaidee"
  ...
}
```

Load from file

```
curl -XPUT 'http://localhost:9200/_template/  
template_kaidee/'  
-d @template_kaidee.json
```

Demo
